Restorative Options for the Edentulous Patient

Course Description

Participants of this program will learn how to incorporate implant overdentures supported by over denture attachments, hybrids, and implant-supported fixed bridges into their practice with predictability and confidence. This course will provide patient management, treatment planning, digital planning, and restorative procedures with edentulous treatment. This program will also include an overview and comparison of conventional denture treatment, overdenture implant attachments, hybrids, and implant-supported fixed bridges, focusing on patient benefits.

Learning Objectives

- Understand patient selection, interview techniques, and case closure for edentulous treatment
- Understand features, benefits, and laboratory process of over denture attachment systems
- Step-by-step procedure for over denture attachments, hybrids, and implant-supported fixed bridges
- Discuss the current treatment options available for partially and fully edentulous dental patients
