

KANSAS CITY IMPLANT INSTITUTE

2018 COURSE DATES

Thursday, January 25th
Thursday, February 22nd
Thursday, March 29th
Thursday, April 26th
Thursday, May 31st

Introduction

Periodontal Specialists, P.A. is pleased to invite you to join us for the **2018 Kansas City Implant Institute Symposium**. This education series will discuss the challenges and successes clinicians experience with implant dentistry in their practice, covering topics such as fixed and edentulous cases, the role of implant design, patient selection, computer guided surgery, digital technology, popular attachment-retained solutions for achieving optimal results, and full arch esthetic diagnosis. The goal of this series is to achieve an educational forum to further increase the general practitioner's and specialist's implant dentistry knowledge, comfort level, and patient acceptance of implant treatment.

Symposium agenda

Dates Thursday, January 25th
Thursday, February 22nd
Thursday, March 29th
Thursday, April 26th
Thursday, May 31st

Thursday, January 25th 2018

Brandon started his dental career right after high school working in the lab of his local dental office. After graduating Dental Hygiene school, he immediately went to work focusing on technology and advanced treatments. Through 10 years of clinical hygiene, he worked in esthetic-based practices, perio practices, and general dental offices. He taught clinical hygiene part time and started his own consulting business focused on technology training and office

production.

Working for Ivoclar Vivadent the last 10 years, he has been trained by some of the best in dentistry with a focus on direct and indirect restorative materials. Specializing in ceramics and resin cements, he still works for Ivoclar Vivadent while training clinicians on cementation/bonding and CAD/CAM based dentistry.

- Understand the different ceramic options available
- Cement selection for esthetics
- Proper bonding steps
- How to mask dark dentin

Thursday, February 22nd 2018

Dona Schulz, ROH, BS, MBA carries over 30 years of expanded dental practice experience as a registered dental hygienist, hygiene director, hygiene consultant, adjunct dental hygiene instructor, dental assistant, corporate advisor and technology trainer. As a professional speaker and published author, Dona shares her passion providing education and clinical direction in empowering, developing, training and mentoring hygienists, dentists and the entire auxiliary team to exponentially grow their clinical practice.

- Regenerative therapies in hard tissue defects, Regenerative therapies in soft tissue defects
- Patient selection/risk assessment, Treatment planning Intra-oral scanning
- Instruction and patient Information, How to grow your practice, Implant coordinator role, Dentistry for the Auxiliary staff

Thursday, March 29th 2018

After graduating from the University of Louisville School of Business with a degree in Marketing and Finance in 1991, Chris purchased ADL Dental Laboratory from Compdent Dental (which was owned by Allan Morris, his father.) With very little experience in the dental laboratory field, Chris decided to educate himself on dental implants, a division of dentistry that was still in its infancy. With the assistance a local General Dentist that was transitioning

his private practice to focus on implant dentistry, surgical to restorative, he began taking every continuing education course that was available and learn not only the laboratory side but also the clinicians side so that he could be an asset to his clients and have a marketable uniqueness over the competition that was skilled in laboratory procedures but NOT implants. His area of expertise is in assisting with treatment planning, the use or multiple implants to restore the edentulous arch and immediate load temporization with fixed hybrids. His experience with fixed hybrids and early on immediate loading protocols, has led him to become a chairside assistant at the surgical step along with the general practitioners restorative procedure. As this procedure has become more popular, Chris has been traveling across the US assisting surgeons, general dentists and laboratories on this procedure and integrating into the mainstream practices. Chris belongs to the CAL lab group, a member or the Micro Dental Laboratory network or laboratories, two Spear study clubs and numerous implant and restorative local study clubs. Chris has lectured for most of the major implant companies, Including, Straumann, Nobel Biocare, Zimmer/Atlantis, Thommen Medical and Blomet 31. He is the Laboratory manager or ADL Dental Lab, a full service lab in Louisville, KY.

- Treatment planning, Guided Surgery, Fabrication or radiographic templates & surgical guides
- Simple restorative procedures, Advanced restorative procedures, CAD/CAM

Thursday, April 26th 2018

Dr. Ryan Lewis has pioneered innovation in prosthodontics. His innovation, skill and passion in the field of dentistry has set him apart and provided his patients with exceptional results. Dr. Ryan Lewis received his Bachelor's Degree in Biology at Murray State University in 2006. He then proceeded to earn his Doctor of Medical Dentistry degree in 2011 at the University of Louisville,

School of Dentistry. Dr. Lewis then completed a 3-year post graduate training program in Prosthodontics at the University of Louisville in 2015. Dr. Lewis is a Member of many prestigious dental associations such as: The American College of Prosthodontists, American Dental Association and International Team for Implantology. Dr. Lewis also specializes in complete oral rehabilitation and has volunteered his dental services in Haiti (2010) and the Philippines (2011). Dr. Lewis enjoys spending time with his family; which includes his wife, twin girls, two dogs and a horse and is quite adept at hunting, fishing, hiking, biking and even piloting.

- Contemporary anterior implant restoration and planning
- Full arch esthetic risk diagnosis and treatment planning for contemporary restorative materials
- Single tooth guided surgery from analog to fully digital protocols
- Fully digital full arch guided surgery, the most advanced guided surgery techniques
- Removable implant prosthetics, patient perception fixed vs. removable

Thursday, May 31st 2018

Ron Roche, Director Business Development for Dental Wings Inc., has been involved with 2D & 3D digital dental imaging and implant dentistry since the late 1990's. Originally trained in engineering and business, he has developed a particular expertise in the application of digital technologies to dentistry to achieve safer, more predictable, and more efficient workflows. Over his dental career, Ron has helped hundreds of clinicians and technicians implement digital technologies into their practices and labs ranging from radiographic & surface imaging systems to electronic dental charting & practice management systems to CAD/CAM design & production.

- Guided Surgery, Intra-oral scanning, Fabrication of radiographic templates & surgical guides.
- CAD/CAM

Periodontal Specialists, P.A.

Melissa A. Combs, D.D.S. is a graduate of the University of Missouri-Kansas City School of Dentistry, where she attended the advanced BA/DDS program, completing both the Bachelor of Arts and the Doctor of Dental Surgery degrees in six years. Dr. Combs went on to continue her education with advanced training at the UMKC Department of Periodontics. Dr. Combs is a Diplomate of the American Board of Periodontology and has completed the highest level of recognition by the specialty. Upon completion of her residency, Dr. Combs earned certificates in periodontology and intravenous conscious sedation. She received extensive training in a variety of periodontal procedures including: esthetic periodontal plastic surgery including gum grafting, gum surgery including pocket reduction/correction, bone regeneration, maxillary sinus lifts, and the placement of dental implants. Dr. Combs is a member of several professional organizations including: American Association of Periodontology, Kansas Dental Association, American Dental Association, and the Midwest Society of Periodontology. Dr. Melissa Combs is the current President of the Missouri-Kansas Society of Periodontics.

Jonathan Thomas, D.D.S. is a graduate of the University of Missouri-Kansas City School of Dentistry, where he attended the advanced BA/DDS program, completing both the Bachelor of Arts and the Doctor of Dental Surgery degrees in six years. Dr. Thomas went on to continue his education with advanced training at the UMKC's Department of Periodontics. In May of 2006, he was awarded "Excellence in Cosmetic Dentistry" by the American Academy of Cosmetic Dentistry for esthetic crown lengthening. Dr. Thomas is currently an Adjunct Assistant Professor in the graduate Periodontal residency program at the UMKC School of Dentistry. Dr. Thomas is a member of several professional organizations including: American Association of Periodontology, Kansas Dental Society, Missouri Dental Society, American Dental Association, and the Midwest Society of Periodontology. Dr. Jonathan Thomas is the current Vice President of the Missouri-Kansas Society of Periodontics. Dr. Jonathan Thomas is also a graduate of the esteemed Leadership Kansas, Class of 2014. Dr. Thomas has been practicing Periodontics in Kansas City, MO since 2007.

Daniel J. Thomas, D.D.S., M.S. earned his Doctor of Dental Surgery (DDS) degree from the University of Missouri-Kansas City, School of Dentistry in 1990. He then entered UMKC's Advanced Education Program in Periodontics, graduating in 1992 and earning a Master of Science degree in Oral Biology and Certificates in Periodontics, Implant Dentistry and Intravenous Conscious Sedation. He has been practicing Periodontics and Implant Dentistry in Leawood, KS, since 1994 and in Kansas City, MO, since 2007. Dr. Thomas is a Diplomate of the American Board of Periodontology and has been awarded the highest level of recognition by the specialty. He has been actively engaged in his profession beyond his daily practice. He was an Assistant Professor in the Department of Periodontics at the University of Missouri-Kansas City, School of Dentistry. Dr. Thomas is a fellow of the International College of Dentists. In addition to providing exceptional periodontal care to his patients, Dr. Thomas also is dedicated to serving his community through public service activities. He is a recipient of the prestigious Ellis Island Medal of Honor in recognition of his "outstanding contributions" to the country. Dr. Thomas has been appointed by the Governor of Kansas to serve as Regent on the Kansas Board of Regents.
